Product Suites

UKG Pro

HCM for midsized to large organizations

UKG Dimensions

Workforce management for midsized to large organizations

UKG Ready

Flexible HR, Time, and Pay for smaller organizations

Customers should be able to migrate a large part of the average configuration as is, and what can't be migrated as is requires simple re-entry and some additional configuration. UKG says that around 70% of the average configuration is migrated as is into Workforce Dimensions. More specifically...

- Timekeeping—65%
- Absence—60%
- Advanced Scheduling—50%
- Clocks—70%
- HR/Payroll—60%

Once you've officially purchased Workforce Dimensions and you get access to your non-production tenant, you'll find that it will be configured with a vertical-specific configuration, which comes from UKG's database of vertical-specific recommended configurations. (This means that 60% of the application will be configured as of Day 1.)
